

# RECYCLED CONTENT

Average Recycled Content of Major Paper Packaging Grades made by Canadian Mills in 2022

2.97

million tonnes of total Canadian mill packaging shipments

80.2%

Average recycled content of domestic shipments for the top two major packaging grades

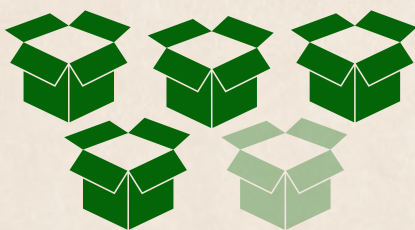

1.43

million tonnes of total domestic recycled content of shipments

The Canadian paper packaging industry is committed to environmental sustainability and waste minimization. PPEC's 2022 Recycled Content Survey results continues to confirm that the feedstock used for the production of boxboard and containerboard made in Canada is primarily recycled content fibres.

81%

Average recycled content for domestic shipments of containerboard

86.2%

Average recycled content for domestic shipments of boxboard
